

Summer Legal Intern – Spire Corporation

Detailed Description:

The Summer Intern shall be responsible for engaging in various legal research and analysis tasks, as directed by Counsel of photovoltaic equipment manufacturer. This shall include reviewing current legislative developments and court decisions in SEC compliance, import/export regulations, construction law, intellectual property, insurance, and general contract law. The Summer Intern shall also provide assistance to the Legal Department in general with day-to-day matters, including but not limited to, review of proposed contracts for photovoltaic manufacturing equipment with customers and vendors, review international guidelines for photovoltaic industry practices, preparation of presentations to company on legal topics, and responding to time-sensitive requests from practices, preparation of presentations to company on legal topics, and responding to time-sensitive requests from other departments.

Job Qualifications:

Current law school student or recent law school graduate; students who have completed their first year of law school will be considered. Must be attentive to details, able to adapt to changing task priorities, and demonstrate the ability to extrapolate broad principles and contractual language from specific events. Familiarity with Sarbanes Oxley, GAAP, and general financial concepts is useful. Experience with patents or electrical engineering a plus, but not required.

Spire Corporation is a leading global solar company providing turnkey solar factories, capital equipment, installed PV systems, and critical services worldwide. With over 40 years of experience and \$100 million in R+D and PV, our unique experience and technical depth puts us in a unique position to ensure the success of our customers.

Spire is uniquely capable of creating new solar companies who can enter quickly and become commercially successful. Spire customers can produce solar cells, solar modules or solar energy. They enjoy rapid entry to the market and certification of their products; and join a growing list of cell – module – and energy producers who can be trusted vendors and/or customers of each other and the market beyond. Spire's factories and equipment address crystalline cells and modules, back-end thin film and CPV solar cell foundry services.

Spire Corporation takes pride in a pleasant, non-smoking work environment.
